

WEBINAR

Corneal ulcers, how to identify them all? How do corneal ulcers heal?

15 de Abril de 2021

Programa:

13.00 - Corneal ulcers, how to identify them all?

13.45 - Intervalo

14.00 - How do corneal ulcers heal?

Oradora:

**Màrian Matas Riera DVM DipECVO PGCertVetEd FHEA MRCVS
EBVS® and RCVS Specialist in Veterinary Ophthalmology**

Màrian graduated from the Universitat Autònoma de Barcelona, where she enrolled a rotating internship. She then moved to the UK as she was offered an ophthalmology internship and followed an ECVO resident at the Animal Health Trust. Màrian then moved to work at the Royal Veterinary College where she was a Lecturer in Ophthalmology and latter was appointed as Head of Service. After over 10 years living and working in highly recognized referral centers in England, Màrian decided to move back home. She is co-directing Memvet, the first referral center in the Balearic Islands, as well as enjoying clinical work. Her case log includes dogs, horses, cats and eventually exotic species. She continues lecturing nationally and internationally aiming to share her ophthalmology knowledge. She is a diplomate of the European College of Veterinary Ophthalmology (DipECVO) and, after completing a postgraduate degree in veterinary education, is a Fellow of the Higher Education Academy (FHEA).
